

CHASÉ : COLLECTIF HAITIEN POUR L'AVANCEMENT DU SUIVI ET EVALUATION

CHASÉ

THE BIRTH OF AN EVALUATION FIRM

Evaluation services in Haiti

Since the establishment of PARIS21 (Partnership In Statistics for Development in the 21st century) consortium in 1999, effort have been devoted throughout the world and specifically in developing countries to promote a culture of evidence-based policymaking and monitoring. Focuses are emphasized on

promoting high quality statistics, making these data meaningful and designing sound policies.

Information is critically important to stakeholders and sponsors to determine the need for

continued funding, determine

program impact, and recommend improvements. In Haiti, the lack of expertise and providers of quality data collection and analysis services have called us to establish CHASE in 2016. At CHASE, **client satisfaction** is of prime interest. Meeting our client's information needs and **quality control** are

on the highest spot while conducting program evaluation. We are offering the opportunity to measure management performance and impact of development programs, and we believe that our contribution is meaningful towards a

better Haiti.

TIMELY DELIVERY AND THE QUALITY OF SERVICE PROVIDED ARE TWO KEY DRIVING FORCES THAT KEEP CHASE ON THE MARKET IN HAITI. WE STRIVE TO UPHOLD THIS MINIMUM STANDARD WHICH GUARANTEE THE SUSTAINABILITY OF OUR BUSINESS

CHASE is a Haitian local firm specialized in the area of program evaluation. Our primary objective is to meet the need of donors and project implementers in terms of program monitoring and evaluation, data collection, data analysis and reporting. Our vision is to take the leadership in conducting program evaluation in Haiti, providing strategic information to stakeholders.

CHASE has a pool of consultants with up to twenty years of experience in the area of program evaluation, with expertise in quantitative and qualitative data collection and analysis, data quality control and reporting. CHASE maintains a database of trained data collectors by departments and sector of expertise. Logistically, CHASE can train and deploy teams of data collectors nationwide in very short notice using paper and android based systems. Please allow us to help you. CHASE is the Haitian firm you can count on, when it comes to data collection and analysis in difficult environment.
